INTERNATIONAL SEARCH REPORT

International application No. PCT/US04/18752

L .	No. I	where certain claims were round unsearchable (Continuation of item 2 of first sheet)		
This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1.		Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:		
2.		Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically.		
3.		Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).		
Box	No. III	Observations where unity of invention is lacking (Continuation of item 3 of first sheet)		
This Pleas	Internatie See C	ional Searching Authority found multiple inventions in this international application, as follows: ontinuation Sheet .		
1. 2. 3.		As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:		
	rk on P	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.		

BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid. Group I, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula I, the composition and method of use thereof. Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the Group II bisectlic compound of formula III with the composition and method of use thereof.	PCT/US04/18752		International application No.	
In a application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid. Group I, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula I, the composition and method of use thereof. Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula			
In a application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid. Group I, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula I, the composition and method of use thereof. Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the composition is the Group I tricyclic compound of formula II, the composition is the following reasons: the Group I tricyclic compound of formula II, the composition is the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula II.	This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid. Group I, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula I, the composition and method of use thereof. Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula			
In a application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid. Group I, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula I, the composition and method of use thereof. Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the composition is the Group I tricyclic compound of formula II, the composition is the following reasons: the Group I tricyclic compound of formula II, the composition is the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula II.	This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid. Group I, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula I, the composition and method of use thereof. Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula			
In a application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid. Group I, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula I, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula			
Group I, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula I, the composition and method of use thereof. Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula II with a content of the following reasons:	Group II, claim(s) 4-8, and claims 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula III with a content of the following reasons: the Group I tricyclic compound of formula III.	I his application contains the following inventions or course of the contains the following inventions or course of the contains the following inventions or co		
Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, with a content of the following reasons: the Group I tricyclic compound of formula III with a content of the following reasons:	Group II, claim(s) 1-3, 9-19 in part, drawn to a compound of formula II, the composition and method of use thereof. Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula III with a corresponding to the following reasons: the Group I tricyclic compound of formula III.	Group I, claim(s) 4-8, and claims 1-3, 9-19 in part drawn to a compound of formula	mate additional examination fees must be paid.	
Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula III with a content of the following reasons:	Group III, claim(s) 1-3, 9-19, drawn to a compound of formula III, the composition and method of use thereof. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II, the Group II bicyclic compound of formula III with a content of the following reasons: the Group II tricyclic compound of formula III.	Group II. claim(s) 1-3. 9-19 in part drawn to a community of the state	i, the composition and method of use thereof.	
The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II with a contempt of the following reasons: the Group I tricyclic compound of formula II with a contempt of the following reasons:	The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Group I tricyclic compound of formula II with a content of the following reasons: the Group I tricyclic compound of formula III with a content of the following reasons:			
I, the Group II bicyclic compound of formula II with a cochard with the following reasons: the Group I tricyclic compound of formula	I, the Group II bievelic compound of formula II with a carbonal and the following reasons: the Group I tricyclic compound of formula			
		I, the Group II bicyclic commound of formule II with a conhead and a six	reasons: the Group I tricyclic compound of formula
